

After qualifying as a Nursery Nurse, I have worked for the past 26 years in Nursery and reception classes across Barnet. During this time, I have also worked 1:1 with autistic children, helping them to integrate into mainstream schools. In February 2021, I joined Parkfield Primary. As Learning Mentor, I work with children from Nursery to Year 6, either individually or as part of a small group.

In September 2013, I was responsible for the introduction, development and management of Barnet Children's University, where students could access extracurricular activities to enhance their learning. I also introduced to the school I was working at, Enabling Enterprise, an initiative where students could visit different well known business' in London to participate in challenge days

I have served as both Local Authority governor and Staff governor in three Barnet schools as well as serving as vice chairman on the Advisory Board of a local children's centre.

I believe I can use these experiences to be an effective Community Councillor for Parkfield Primary School and look forward to the exciting challenges ahead.
