

I have just become a community council member after having worked at Parkfield Primary School for the last 8 years. First as a TA, working across the school supporting children with a variety of needs and abilities. Now as a class teacher after being given the opportunity and support by the school to train as a teacher. I am also the Science Lead responsible for ensuring all our pupils make excellent progress in Science. Before coming to Parkfield Primary, I worked as a teacher of English as a Foreign Language for 10 years in Spain.

I decided to become a Community Councillor as it presented me with the opportunity to give back to a school and community I feel a part of. I am excited to see the school continue to flourish as an essential and central pivot of the community. I believe in the potential every pupil has and it is my responsibility to ensure each child is given the opportunity to do so.
